

Computer Components – Instructions – Y5

The aim of this piece of work is to look at the different components of modern computers and what their functions are. We will also be looking at the ways that computers link together and share information through networks.

All pupils will have a written task – definition match where they need to get the correct label for each of the computing terms in the list.

1) Inside the computer

There are 3 sources of information for this

- a. Components intro (powerpoint)
- b. [Youtube video – inside the computer](#)
- c. [BBC education game – inside the computer](#)

2) Networks and internet

This has one [video link](#) that provides a user friendly explanation of internet operation

You may need to complete further research to match up a couple of the definitions!
